## 14 Year Parent SLQ Questionnaire Dataset Coding

Entries in red denote variable names and values used in the analysis dataset.

This document was created on 4 February 2009 and last updated on 30 August 2023.

Notes:
The layout and formatting of the questionnaire have been somewhat modified in order to accommodate annotations of variable names and value codes.
2. Responses to language name questions were taken up as verbatim text in the original raw data but have subsequently been recoded into numeric codes. The language coding is shown for each relevant question and is summarized in the appendix at the end of this document.
3. This document shows item variables, not derived variables; however, in some cases the item variables themselves have been recoded or restructured from the raw data.
The variable names in the analysis dataset (starting with 'nsl') differ from the variable names used in the raw data.
5. The value coding used in many of the variables (shown here) has been changed from the coding used in the raw data (documented elsewhere).
6. In the analysis dataset, missing values are used in place of the value codes used in the raw data ( -99 for missing, -77 for not applicable, -1 for not available).
The items in this questionnaire are all twin-specific, where the parents are asked questions about the elder and younger twins separately. In the dataset, these items have been double-entered, with one row of data per twin, and with the twin and co-twin data in each row. Hence, those twin-specific variables with names ending in ' 1 ' refer to the twin identified in a given row of data (regardless of whether this is the elder or younger twin of a pair); those variables with names ending in ' 2 ' refer to the co-twin. This means that the same variable names are used where the same question is repeated for 'Twin $1^{\prime}$ and 'Twin 2'.
8. Several changes were made in different versions of the questionnaire:
a. The "test results" (SATs) were dropped after cohort 1 , hence these variables have missing values for twins in cohorts 2/3/4.
b. In the "teacher assessments" for modern foreign language, the language name was added in cohort 2, hence is usually missing for twins in cohort 1.
c. Variables for additional languages ( $2^{\text {nd }}$ modern foreign language teacher assessment, languages used at home, languages learned at school) were added at various stages after cohort 2; these were incorporated into the online questionnaire and into later versions of the data entry forms, after finding that families had annotated the paper questionnaires with additional languages. As a result, these variables have varying amounts of missing data.
$\square$

## National Curriculum Assessment Results 2008

Twin 1: Please tick to indicate performance level at the end of Key Stage 3.
Test results were only recorded for cohort 1, because the Key Stage 3 'SAT' tests were ended the following year in England and Wales.
For test results, there were negligible responses at levels $W$ and 1 , hence the recoding as shown to value 2 meaning level 2 or lower.

| TEST Result |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | W | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | NA |  |  |  |  |  |
| English nslengs1/2 | 2 | 2 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |  |  |  |  |  |  |
| Mathematics nslmats1/2 | 2 | 2 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |  |  |  |  |  |  |
| Science nslscis1/2 | 2 | 2 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |  |  |  |  |  |  |

Teacher assessments are recorded for all cohorts.
For teacher assessments, there were negligible responses at level $W$, hence the recoding to value 1 meaning level 1 or lower.

| TEACHER Assessment |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Please state the language <br> assessed nslla1n1/2 * |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Modern Foreign Language 2 <br> nslla2t1/2 | 1 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |  |  |  |  |  |
| Please state the language <br> assessed nslla2n1/2 * |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

W = working towards level 1; EP= Exceptional Performance; NA = Not Available.
Teacher assessments were recorded for up to 2 modern foreign languages for each twin.

* Assessed foreign languages are numerically coded:

2=Welsh, 3=French, 4=German, 5=Spanish,
6=other modern European languages (Italian and others), 9=other.
Note that the languages assessed were not requested, hence are missing, in cohort 1 , but are present for cohorts 2, 3 and 4.

Twin 2: Please tick to indicate performance level at the end of Key Stage 3. Double-entered dataset variables are as shown above for twin 1

| TEST Result |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

W = working towards level 1; EP= Exceptional Performance; NA = Not Available.

1. What languages do you and other adults at home use with the twins?

English plus up to two foreign languages were recorded in the data for each twin. This language is used:

## Language

$\begin{array}{ll}\text { Twin } 1 & \text { English: nslhleng1/2 } \\ \text { Twin 2 } & \text { (coded } 1=\text { yes 0=no) } \\ & \text { nslhl1n1/2 * } \\ & \text { nslhl2n1/2 * }\end{array}$ nslhl1n1/2 * nslhl1u1/2
nslhl2u1/2

| All or most of <br> the time <br> 1 | Half of <br> the time <br> 2 | Less than half of <br> the time <br> 3 |
| :---: | :---: | :---: |
| 1 | 2 | 3 |
| 1 | 2 | 3 |

* Coding for foreign languages used at home:

2=Welsh, 3=French, 4=German, 5=Spanish,
6=other modern European language (French, Italian, Greek and others)
7=Asian language (Urdu, Punjabi, Gujerati, Bengali and others)
2. What is the main language used at school?

Twin 1 nslscla1/2
English Welsh
Twin 2
3. What languages are currently studied at school (including English)?

English was not always recorded as a language studied. Where it was recorded, the age and use out of school were coded into the variables shown in the first row of the table.
Variables have been retained for up to three languages other than English. The numbers recording a fourth language in the raw data were negligible.

Age at which Approximate time they use language
Language
they started outside of school
learning
Often Sometimes Never
(years)

| Twin 1 | English: | nsllsenga1/2 | nsllsengu1/2 | 1 | 2 | 3 |
| :--- | :--- | :---: | :---: | :---: | :---: | :---: |
| Twin 2 | nslls1n1/2 * | nslls1a1/2 | nslls1u1/2 | 1 | 2 | 3 |
|  | nslls2n1/2 * | nslls2a1/2 | nslls2u1/2 | 1 | 2 | 3 |
|  | nslls3n1/2 * | nslls3a1/2 | nslls3u1/2 | 1 | 2 | 3 |

[^0]A common set of numeric codes has been used for language variables in all parts of the questionnaire.

As shown in the table, not all of these codes were used in all these dataset variables, depending on the frequency of responses. For example, in the Teacher Assessments for foreign language, there were negligible responses for Asian languages and these are coded as $9=0$ ther.

|  |  |  | Codes are used in: |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Code | Language /group | Includes | Foreign <br> language <br> assessed <br> for TA | Foreign languages used at home | Languages studied at school | Main <br> language used at school |
| 1 | English | English | - | - | Yes | Yes |
| 2 | Welsh | Welsh | Yes | Yes | Yes | Yes |
| 3 | French | French | Yes | Yes | Yes | - |
| 4 | German | German | Yes | Yes | Yes | - |
| 5 | Spanish | Spanish | Yes | Yes | Yes | - |
| 6 | Other modern European | ```Italian, Dutch, Finnish, Russian, Greek, Irish, Polish, Swedish, Portuguese, Turkish``` | Yes | Yes | Yes | - |
| 7 | Asian | Chinese, Japanese, Urdu, Punjabi, Bengali, Hebrew, Arabic, Korean, Maori, Persian | - | Yes | Yes | - |
| 8 | Classics | Latin, Ancient Greek | - | - | Yes | - |
| 9 | Other | Any others not coded into categories above | Yes | - | - | Yes |

[^0]:    * Coding for non-English languages studied at school:

    2=Welsh, 3=French, 4=German, 5=Spanish, 6=other modern European languages (Italian, Greek and others), 7=Asian languages (Chinese, Japanese, Urdu, Punjabi, Gujerati, Bengali and others), 8=classical languages (Latin, Ancient Greek)
    ** The age variables have integer values 4 to 14.
    In most cases, parents interpreted the question as the age at which twins started learning each language in school, hence in most cases parents recorded age 4 years for English, for example. In the relatively few cases where ages below 4 were recorded in the raw data, these have been recoded to value 4 , hence meaning 4 years or lower.
